

War Robots Cheats & Black Market Key Optimization 2026

Superchest Acceleration, Key Farming & Chest Probability Analysis

Executive Summary: Master War Robots cheats for Black Market key acquisition and Superchest progression in 2026. Calculate exact key requirements for 1000-key chest openings and overdrive events.

1. Black Market Progression Mechanics

The Black Market offers 10, 100, and 1000 key chest tiers. Opening chests fills the Superchest bar, which guarantees Tier 4 titans, special edition robots, or heavy weapons upon completion.

2. Chest Tier Yield & Efficiency Matrix

Chest Tier	Key Cost	Superchest Fill Rate	Best Yield Focus
Bronze Chest	10 Keys	Low (1x)	Ag / Microchips
Silver Chest	100 Keys	Medium (10x)	Mid-Tier Equipment
Gold Chest	1000 Keys	Optimal (100x)	T4 Weapons & Modules

3. Superchest Overdrive Timing Strategy

Accumulate keys throughout the month and spend them exclusively during +50% or +100% Superchest progress events. This doubles the value of every key collected during daily play.
